Mean age: -

Profit 2014: +553,377 RON

Needs:

In Romania in the communist era, it was 3 OEM's company.

Now, it's only one, Avioane S.A. which is in an economic disaster.

There are 3 maintenance company and around 8 suppliers companies.

If we analyze economically these 12 company, we will discover that 3, maybe 4 of them are in a bad economic situation (2 are private and 2 belongs to the state).

If we analyze by the age of the employees, it's a disaster! The age average in 10 of them, is more than 45 years!!!

If we made an analyze about the precarious work places, we discover that in companies that belong to the state, there are almost none precarious work places.

In private companies, the precarious work places are around 10% of the total work places.

Thank You!
